

Southeast 22Q Support Group

Remember, It is for the Children!

Our Mission is:

Bringing awareness of 22Q deletion to parents, educators, healthcare providers, and government branches with current and correct information. Motivating an interest in medical research, birth screenings, offering educational and treatment opportunities for individuals and families of 22Q deletion.

Dear Families,

We are a group of parents with children ranging from newborn to adulthood diagnosed with 22Q deletion. We know only too well the overwhelming emotions that can come with a diagnosis. Many times, one can feel isolated as family and friends do not always understand the enormity of what you are going through. For these reasons we have formed a support group in Atlanta, Georgia to come alongside you and offer the support that you need. We are here to offer help and encouragement in any way that we can. Come join us at our meetings and social gatherings, or simply give us a call and we will try to provide the assistance you may need.

Sincerely,
Proud Parents
