Who We Are

Steve Warren, PhD
   Chairman, Dept of Human Genetics

Stephanie Sherman, PhD
   Professor

Jeannie Visootsak, MD, FAAP
   Developmental Pediatrician
   Medical Director

Lillie Huddleston, PhD
   Director of Psychological Services

Meagan Smith, MS, CGC
   Genetic Counselor
   Program Leader

Kimberly Lewis, MS, CGC
   Genetic Counselor

Jean Luan
   Clinical and Research Assistant

Krista Charen, MPH
   Study Coordinator

Lisa Shubeck
   Study Coordinator

Fragile X Syndrome Center
Emory University
School of Medicine

Our Fragile X Syndrome Center includes a long standing history in research, clinical services, and education of fragile X syndrome and its associated disorders. We are on the forefront of many groundbreaking discoveries, including the *FMR1* gene by Dr. Steve Warren in 1991. We are currently participating in clinical trials for targeted treatments of fragile X syndrome.

We gratefully acknowledge the Fragile X Association of Georgia and the Heyman Fragile X Outreach and Education Program at Emory University for their support.

Fragile X Syndrome Clinic

EMORY UNIVERSITY

Department of Human Genetics
School of Medicine
The Fragile X Syndrome Clinic

The Fragile X Syndrome Clinic serves children with fragile X syndrome from birth through age 18 years. Each family's visit is an individual appointment. Our clinic team includes physicians and staff who have extensive experience in genetics, development, and behavior with an emphasis on the needs of individuals with fragile X syndrome and their families. Our clinic is a specialized resource and complements the care provided by your child's pediatrician.

What can we expect during our clinic visit?

During your initial clinic visit, we will: review your child's fragile X result, discuss fragile X syndrome and its associated disorders, complete a physical examination, explain our recommendations and treatment plan, make referrals to specialists as needed, and most importantly, address your questions and concerns. You will also be given an opportunity to participate in our research projects if you are interested.
