**Rabbit anti-Arl13b antibody**

Store @ 4 ºC for up to a month. For longer storage, aliquot and place in -20º or -80º. Avoid freeze and thaw cycles.

**Recommended dilutions**

- Western Blot: 
  1: 2,000

- Immunohistochemistry
  1: 1,500

We send small aliquots to researchers for them to test. Do not hesitate to contact me if you have any problems with the antibody and/or need more supply. Of course take in consideration that is a limited supply of a polyclonal antibody; try to be wise while using it. Thanks!

**Expected results for IF on tissue culture cells:**

**Expected Results for Western Blot from e12.5 mouse embryos lysates.**

WT vs Arl13b mutant (hnn). The product is ~ 60 kDa.
